TERMS OF SALE

2% for cash with order
or 2% 10 days, 30 days net for established accounts.

Unless otherwise specified, Bulbs will be shipped when dug in the Fall. Approximate earliest delivery date is indicated for each variety.

We will accept orders for spring delivery provided they reach us not later than December 1. Spring orders will be placed in cold storage and shipped as directed at no extra cost until April 1. After April 1 a nominal charge will be made for storage.

All Bulb prices are F.O.B. Lake Grove, Oregon, and are subject to change without notice.

Our wholesale price lists are intended for the trade only. Kindly do not hand them to amateur growers.

In ordering please specify whether shipment is wanted via parcel post, express, or freight. If wanted by post kindly include postage with remittance.

In shipments of 100 pounds or more we find air freight rates to the principal cities cheaper than railway express or equivalent to motor freight rates. In many instances this may be your cheapest and fastest means of delivery.

We will accept Trade orders for direct shipments to retail customers at our regular prices for the quantities involved plus postage and a moderate packing charge. We suggest that such orders be accompanied by the seller's mailing labels properly addressed and such shipping instructions as may be needed.

Orders for growing crops accepted subject to crop failures, shortages, or other matters beyond our control.

Any claims for shortages or errors must be made within five days after receipt of goods as we will not be responsible after that time. We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter in connection with the success of the seeds, bulbs or plants sold by us and will not be responsible in any way in cases of failure, other than to replace bulbs untrue to name. If the purchaser does not accept the goods on these terms, they are to be returned at once.

QUANTITY RATES ON LILY AND MISCELLANEOUS BULBS

25 Bulbs one variety and size at 100 rate.

250 Bulbs one variety and size at 100 rate less 10%.

Wholesale orders cannot be accepted for less than five bulbs of one variety and size except on items priced per each. Where so priced 1 to 25 bulbs will be supplied at the each price, 25 or more at single bulb price less 10%.

Flowering size indicates bulbs which will have flowered at least one season in our nursery. Large or 1st size bulbs are top size for the particular variety.

In compiling this list of northwest grown lilies we have added several varieties of which we have ample stock to offer this season. In addition we grow moderate quantities of a number of other varieties and welcome inquiries concerning any which are commercially available at the present time.

In the following price list we have endeavored to briefly describe all of the stock offered by indicating flower type and size, color, height (maximum average for mature established bulbs) and flowering period under Northwest climatic conditions.

LILIES

For Garden and Greenhouse

In this, our 1962 catalogue, we are pleased to again offer to the nursery and horticultural trade a most complete listing of lilies which have been a specialty with us for the past 32 years. It is encouraging to note the increased popularity of this genus each season and the public's acceptance of them as an important part of the garden picture seems quite assured. The numerous Lily Shows and exhibitions throughout the country sponsored by regional and national groups of enthusiasts have an important part in acquainting gardeners with their beauty and ease of culture. Professional horticulturists are urged to attend these shows and join the national and regional societies in their locality.

Our catalogue this season lists many hybrids, both clones and strains, and we are pleased to again be able to offer the Temple hybrids and also several new Aurelians, the latter as 1962 introductions. An increased interest in lily species is apparent among experienced growers and our collection is most complete with as wide a variety of Types offered as may be found in this country. Our specialty lines of Hardy Cyclamen, Erythroniums, Trilliums, etc., continue to grow in popularity and are rapidly becoming a major portion of our sales. These plants have a ready appeal to gardeners interested in the unusual and we are adding varieties to our lists as rapidly as available stocks permit. While we endeavor to maintain stocks commensurate with the demand, early orders would be very helpful and we would suggest that your requirements be placed at least thirty days prior to the shipping dates indicated for the various bulbs offered. Our renewed thanks to our many customers for their continued support and welcome suggestions. We assure you that we will continue to ship only the best stock available, with each order our personal responsibility.

1962 INTRODUCTIONS

L. AURELIAN AVALANCHE TRUMPETS—An unusually attractive strain of long tubular trumpets of strong texture which flare widely at the face with gently recurving petal tips. The pure white flowers have greenish yellow throats with golden brown anthers creating a pleasing contrast. The moderately tall stems, 5 to 6 feet, carry numerous gracefully arranged flowers in late July. A cool color for warm summer days.

L. AURELIAN GREEN CORONAS—A carefully selected strain with large green and white flat opening lightly reflexed flowers on 4 to 6-foot stems. A valuable addition to the color range in this group. July to August flowering.

L. AURELIAN HYBRID "GREENSPRITE"—A newly selected clone with large flaring pendant flowers, the petal edges gracefully waved. Pure white with light green center, the reverse and buds sap green shading to white at the tips. Ten to twelve flowers are carried on 5-foot stems during late July. Easily the best of the green-white clones.

L. AURELIAN HYBRID "REVERIE"—Large flat opening flares with slightly recurved tips. The heavy textured flowers are Chinese yellow shading to almost white at the petal tips with deep green throats lightly flecked garnet brown and with garnet brown anthers. Somewhat shorter than most Aurelians, the slender stems rise 4 to 5 feet carrying ten to twelve pendant flowers in mid-July. The deep green foliage is gracefully curved and curled. A fine showy clone for midseason bloom.

LILY HYBRIDS

The **Aurelian Hybrids**—Flower Types contained in this group comprise three distinct forms as follows:

CORONAS—Reflexed or recurved in varying degrees. Petals of medium width. Moderately tall plants producing flower heads excellent for cutting as well as garden decoration.

FLARES—Large, wide flaring flowers intermediate in form between Trumpet and Recurved. A very distinct flower type with a brilliant color range.

TRUMPETS—True Trumpet shaped flowers on medium to tall stems. The flowers are large and of heavy texture.

The above three Types are subdivided into select color strains as offered below. The color strains are carefully selected at flowering time to eliminate any off colors or inferior blooms.

In addition we offer several select clones in the Aurelian group and a strain of special select semi-bowl and semi-recurved types in pastel colors.

L. Cameo Hybrids—A new strain of hybrids derived from crosses of L. Auratum Platyphyllum and its variants with forms of L. Japonicum. Two distinct color groups have been selected in this strain, both of which carry large bowl shaped flowers. The Pink Cameos are entirely pink in varying shades with occasionally a few deeper pink dots toward the base of the petals. The White Cameos are pure white except for a faint suggestion of a gold band and occasionally a few pink or yellow dots in the flower throat. Both color strains are pleasantly fragrant. Height 3 feet. Flowering period late June to late July.

The Centifolium — Temple Hybrids — The countless variations of flower shapes and color tones of the Temple Hybrids are fantastic. Each plant has an individual beauty unlike all the others. This constantly improving strain of tall trumpet lilies is the product of many years of selective hybridizing of the native species of China and Burma. All of the Temple Strains are selected seedling bulbs which are marked separately during the flowering season each year.

Amethyst Temple — Massive trumpets varying in color from light amethyst pink to deep columbine red. Both the light and dark selections are rich and clear in this amethyst color and are free of any distracting brown overtones. The pink and amethyst shading is on the interior as well as the reverse of the petals. Splendid for cutting or in the garden. In warm sections, planting in light shade is preferable to avoid bleaching. 5 to 7 feet. July flowering.

Marble Temple—All of these choice lilies are unusually beautiful, strong growing, and very resistant to disease. The varying tones of lustrous white, ivory, or cream-white with the contrasting exterior markings resemble the colors seen in the finest marble. The large trumpets vary in their external color from pink, red, burgundy, brownish-purple, fawn, olive, cream-yellow, green, or to many multi-colored variations. The centers are yellow, light green or pure white. Some trumpets are funnel shaped; others are more open with rolled petal tips; and some are bowl-shaped with expanded or slightly twisted petals. 5 to 7 feet. July and early August flowering.

Sun Temple—The new Sun Temple Hybrids are now one of the most remarkable of all yellow trumpet lilies. Seen with other yellow trumpet lily strains, their distinct color at once stands out as bright, clean, and uncluttered with other clashing exterior markings. From near or afar, they look yellow and are yellow inside and outside. Their uniform color spectrum is from lemon yellow to primrose yellow. Some are faintly marked with a narrow soft green exterior rib, but this shading blends well with the yellow and does not offer an unpleasing contrast. Sun Temple is also very vigorous in its growth and its color holds up well in hot summer weather. July and August flowering. Height 5 to 7 feet.

Topaz Temple—These tall trumpet lilies are very colorful with a wide variety of interesting shades of light yellows. Individual plants vary from light mimosa yellow to light apricot. All of the colors are delicate pastels and like the other Temple Hybrids, most of these lilies have various shadings on the trumpet exteriors. A hybrid strain derived from intercrossings of Sun Temple and the Celestial Hybrids. July and August flowering. Height 4 to 7 feet.

Our "Reference Chart of Lilies for Garden and Greenhouse" contains over 2000 items of cultural information covering most of the commercial lilies. Single copies are available to the wholesale trade at .85 each postpaid. On request we are prepared to quote quantity prices on the chart for resale. A number of our customers are offering it in their catalogue listing lilies.

"Basic Lily Culture," our new pamphlet of information for both the novice and experienced grower, is designed to answer the questions most usually asked concerning the successful cultivation of hardy lilies and is based on over 30 years experience with the genus. Copies may be secured at a cost of 8 cents each in any quantity up to 100. We will be pleased to quote prices on larger quantities upon request. We feel that it will be of material benefit to the Trade to include these instructions with all retail lily orders, particularly to customers who have had limited or no experience in Lily culture. A successful beginning will most likely assure repeat orders in future years.

"Hardy Cyclamen Culture," a leaflet of complete instructions on growing these popular plants will be included with all cyclamen orders. Additional copies will be supplied at 7 cents each.

We will also include with each cyclamen order a copy of our new color display card. This card is designed to assist in the sale of these plants by mentioning their chief attributes in concise, quickly readable form. We suggest using the card with displays of cyclamen corms or plants either for nursery or counter sale. Additional copies are available on request.

As mentioned in our previous Trade lists, we now have available a new set of color transparencies for lecture and sales aid use. This set has been expanded during the past years and the list now includes over 250 subjects from which to choose. These photographs can be supplied as slides (2 x 2), enlarged transparencies in sizes 2¼ x 3¼ and larger, or as color prints. A complete list of subjects available and details of their cost will be sent promptly upon request. In corresponding kindly advise whether slides, enlarged transparencies or prints are needed and approximate quantity.
